LARGE CAP 100 MUTUAL FUND (GTLOX)

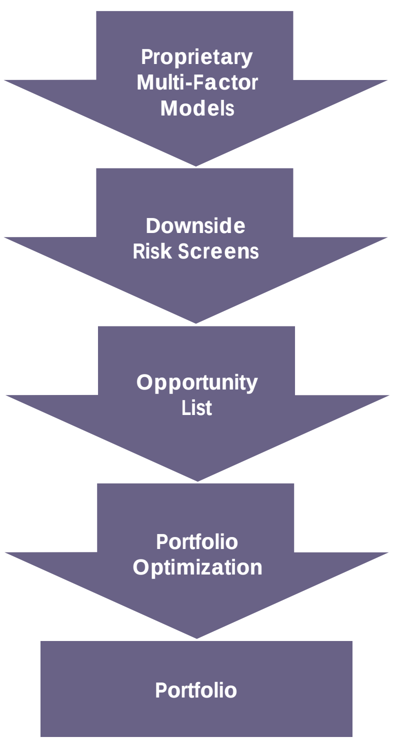
2ND QUARTER 2010

Investment Objective

Glenmede believes that an equally weighted portfolio of large cap stocks, constructed with a disciplined blend of proprietary multi-factor models and downside risk screens, will achieve superior long-term performance.

Investment Process

- Invests in large cap companies with an attractive combination of valuation, fundamental, earnings and technical characteristics.
- Portfolio is based on proprietary, multi-factor models to rank stocks within each sector.
- The portfolio is optimized to provide broad diversification across sectors, industries and individual companies, while controlling turnover.
- Candidates are domestic stocks in the Russell 1000, S&P 500 and other companies over $2 billion in market capitalization.



All data as of 06/30/10

Product Highlights

- Quantitative investment process with stringent risk controls
- Core large cap strategy benchmarked to the Russell 1000
- Inception date of February 27, 2004

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The Glenmede Funds' prospectus contains this and other important information about the investment company, and it may be obtained by calling 1.800.442.8299, or visiting www.glenmedeim.com. Please read the prospectus carefully before you invest or send money. ***Mutual fund investing involves risks; principal loss is possible. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods.*** Performance represents Large Cap 100 average annual rate of total return for The Glenmede Fund, Inc. Large Cap 100 Portfolio. All returns are calculated in U.S. dollars. **Alpha:** measures risk-adjusted performance against the relative benchmark. **Beta:** systematic risk of a portfolio; represents sensitivity to the benchmark. **Excess Return:** amount that returns exceed relative benchmark return. **Information Ratio:** ratio of expected return to risk, as measured by standard deviation. **Price to Book (P/B):** ratio of stock price to per share shareholders' equity. **Price to Earnings (P/E):** ratio of stock price to earnings. **R^2:** measures how much performance reflects the returns from the relative market. **Return on Equity (ROE):** net income divided by equity. **Standard Deviation:** measures dispersion of a set of data from its mean. **3-Year EPS Growth:** historical earnings per share growth over the last 3 years. **Tracking Error**: measures the active risk of the portfolio and the annualized standard deviation of the excess returns between the portfolio and its benchmark. **Weighted Average Market Cap:** total value of all outstanding shares weighted to reflect the portfolio's positions. The Russell 1000 Index is an unmanaged, market-capitalization-weighted total return index comprised of the largest 1,000 companies in the Russell 3000 Index. This unmanaged index is a total return index with dividends reinvested. The S&P 500 Index is a broad based unmanaged index of 500 stocks, which is widely recognized as representative of the equity market in general. **One cannot invest directly in an index.** Total returns comprise price appreciation/depreciation and income as a percentage of the original investment. Returns less than one year are cumulative. The information provided above is as of 06/30/10 and is subject to change. The Fund is distributed by Quasar Distributors, LLC. (07/10)
